

# PROVEN QUALITY, RELIABILITY AND ACCURACY.

## DS405 Lubrication Monitor Features

The DS405 is a completely new dedicated product for the monitoring of automatic oil or grease lubrication systems.

Our new DS405 is a highly configurable product that can be adapted for virtually any application.

It records the total lubricant delivered to each bearing and provides the end user with reliable and accurate data.

- Large graphic display for ease of setup and clear monitoring status.
- Immediately communicates alarms to your PLC or our SC400 control, providing protection to all critical lubrication points.
- Real-time clock with warning and alarm data logging up to 1000 events.
- USB port for downloading.
